How to remove the mechanism (For classified disposal)

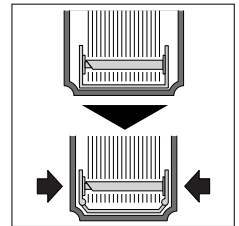

Striking the side of the mechanism with wooden hammer, mere rotation of the mechanism can make it possible to classify cover and mechanism very simply.

Simple to open and close

One touch open/close mechanism is composed of 2 parts i.e. pipe and post. If the post and document are pulled out together, the in-between document can be picked up simply.

Space saving slim design

Slim design having the same containing volume of document as before with a narrow spine width improves the space efficiency of office.
