

Basic Pack

This is a set of six TEPRA PRO tape cartridges in basic colors.

SC126T (12mm-wide)
SC186T (18mm-wide)

- Set of six different color labels: RED, YELLOW, GREEN, and BLUE colored label (with BLACK text); WHITE label (with BLACK text); and CLEAR label (with BLACK text) (This set includes one of each)

Head Cleaning Tape

This is a dedicated cartridge allows you to clean the print head easily by feeding the tape.

SR18C
(For printer models that support 18mm-wide tape)
SR24C
(For printer models that support 24mm-wide tape)
SR36C
(For printer models that support 36mm-wide tape)

- This is an exclusive tape for the TEPRAPRO series.

Tape Cartridge Container

SR4TH
This storage box with a handle is designed to store forty 12mm-wide tape cartridges. It is divided into four boxes, allowing you to organize the tapes according to their color, width, or usage.

Trimmer

RT36W
This scissors-type trimmer is used for making rounded corners for printed labels. It can also be used to make straight cuts, making it convenient to make adjustments to label margins. Two types are available for making large rounded corners (3mm radius) and small rounded corners (1.2mm radius) respectively.
* This product may not be compatible with some tapes.

Precautions

●The number in the product code of the tape cartridge (first digit or first two digits) indicates the label width in millimeters. ●The Tapes are made of PET, except for Iron-on, Paper, Kraft, Heat-Resistant, Masking Tape (mt), Cable, Light-Fast Label, Magnetic Tape, Heat-Shrink Tubing, and Ribbon. ●Cut Iron-on, Heat-Resistant Label, Magnetic Tape, and Ribbon using ordinary scissors or any other similar tool. ●The built-in half-cut feature in the TEPRAPRO printer cannot be used on Heat-Shrink Tubing, Iron-on, Paper, Kraft, Heat-Resistant Label, Magnetic Tape, White Label (Long), or Ribbon. ●The built-in trimmer in the TEPRAPRO printer cannot be used on Iron-on, Paper, Heat-Resistant Label, Masking Tape (mt) Label, Magnetic Tape, Heat-Shrink Tubing, Ribbon, or 4mm/6mm Tape. ●Color Label (Pearl) may come off easily if exposed to direct sunlight for long periods of time. ●Iron-on Label may not stick depending on the surface conditions or materials of the fabrics. ●Although Iron-on Label can be washed at home and dry cleaned, they may occasionally peel off. ●Placing Magnetic Tape near magnetic stripe cards such as commuter passes and cash cards, as well as magnetic storage media such as floppy disks, may result in data corruption or loss. Usage in high-temperature environments may damage the adhered surface. ●The print on Light-Fast Label and Magnetic Tape may turn out faint in low temperatures. ●Use an industrial dryer to shrink Heat-Shrink Tubing. Soldering irons, sources of flame such as lighters, or household dryers may not be effective. ●When Heat-Shrink Tubing is set in the printer, the width of 5mm-diameter tube will be displayed as 6mm, and the width of 11mm-diameter tube will be displayed as 12mm. An 11mm-diameter tube can only be used with a model supporting 24mm-wide tapes. ●Do not use Heat-Shrink Tubing and Cable Label if voltage endurance is required (for insulation purposes). ●Cable Label may not stick to the non-circular cable or some other cables depending on its materials. ●Index Label has a perforated line for easy pasting. Do not tear along the perforation. Printing over the perforation is not recommended. ●Removable Label uses a weak adhesive and may come off if adhered to coarse paper (recycled papers, corrugated papers, flat files, etc.), uneven surfaces (polypropylene plastic products, leather goods, embossed items, etc.), curved surfaces, or stretchable surfaces. The adhesive will tend to remain or the labels may still come off even if placed outdoors or anywhere exposed to direct sunlight, or in a hot and humid environment. ●Heat-Resistant Label can be used in an environment with a temperature of 100°C or higher. The color of the label may change due to the surrounding environment and with time. First check the environment where it will be placed before use. ●Frequently touching or brushing Masking Tape (mt) and Kraft Label may result in faded print or loss of color or the pattern itself. ●When using Masking Tape (mt), Cable and Light-Fast Label be sure to remove the cartridge from the printer when not printing to keep the ink on the head from transferring to the tape. ●For models with configurable speed, set the speed to low when printing on Paper, Masking Tape (mt) and Kraft Label. ●The print on Ribbon may be distorted due to their material properties. When setting the tape cartridge, please check first whether Ribbon has been set straight before printing. ●The print with Ribbon tends to be faded more easily compared to regular TEPRAPRO tape due to their material. Printing fine or outlined characters, shading effects, and background patterns is not recommended. ●When using Ribbon, the top and bottom of large characters or borders may not be printed depending on the settings. ●Printing in low-temperature environments may affect printing results on Ribbon. (Recommended temperature: 15°C to 35°C) ●Frequently touching or brushing Ribbon may result in print becoming faded or transfer of colorant from the ink ribbon to your hands. Colorant is not harmful; wash it off with water if it gets on your skin. ●The recognized width of Scalloped Edge Ribbon is 9mm. Please select a width of 9mm for models that allow manual recognition of tape width. ●Discoloration of the label, peeling off, fading of letters, difficulty in peeling off, leftover adhesive after peeling off, damage to the surface underneath the tape, or transfer of label color to the surface underneath the tape may occur depending on the properties, environment, and condition of the adherend with plasticizers, such as vinyl chloride, at the time of sticking.

⚠ Safety Precautions

Be sure to read the instructions before use to ensure proper, safe operation.

●The tape cartridge shown is a TEPRAPRO tape cartridge. Use only label printers that accommodate TEPRAPRO tape cartridges. ●Tape cartridges of certain widths may not be accommodated depending on the model. Check the widths of accommodated tapes indicated on your TEPRAPRO printer. ●The sample label color may differ from the actual color due to catalog printing. ●Note that the specifications, prices, and designs in this catalog are subject to change without prior notice. ●KING JIM and TEPRAPRO are trademarks or registered trademarks of KING JIM CO., Ltd. ●Information in this catalog is accurate as of June 2023.

If you have any questions or requests concerning post-purchase services, please consult the place of purchase or our Customer Service.

TAPE CARTRIDGE CATALOG 01

Use only label printers with this logo

Various tapes that cater to different purposes.

Sample Labels at Actual Width

4mm-wide For organizing small items and supplies

ext. [C 1018] [C 1019] [C 1020] [C 1021]

6mm-wide For reminders on phones and other small devices

⚠ Please switch off after you finish.

9mm-wide For organizing items

⚠ Follow the manual.

12mm-wide For labeling files

• Sales Budget
• Year Ending Dec. 31

18mm-wide For keeping the office neat and orderly

Asset name	Laptop
Admin no.	abc0123
Date	01/04/20xx

24mm-wide For in-store POP displays and indoor displays

Sale! UP TO 80% OFF

36mm-wide For attention marking in public environments

⚠ **WARNING**
Electrical Hazard
Do Not Touch

Printing results may vary depending on the printer model.

The vast lineup of PRO tapes continues to find more and more uses.

Heat-Shrink Tubing

WHITE / BLACK INK (Ø5mm) SU5S (Ø11mm) SU11S

2.5m roll

Upon application of hot air with an industrial dryer, the tube shrinks and adheres tightly to the cable.

Cable Label

WHITE+TRANSPARENT / BLACK INK SV24KN SV36KN

8m roll

This is a self-laminating label that can be printed on the white part before going round the cable with the clear part.

Magnetic Tape				
RED / BLACK INK	SJ12R	SJ18R	SJ24R	SJ36R
PINK / BLACK INK	SJ12P	SJ18P	SJ24P

WHITE / BLACK INK	SJ12S	SJ18S	SJ24S	SJ36S
WHITE / RED INK	SJ12SR	SJ18SR	SJ24SR	SJ36SR

This magnetic tape can be applied to and removed from white boards or steel fixtures repeatedly.

Heat-Resistant Label

WHITE / BLACK INK SN6K SN9K SN12K SN18K

2m roll

The labels can be used for processes with a high-temperature environment such as soldering on printed circuit boards. (heat-resistance proved under 200°C/10 hours)
