**TEPRA Lite tape is made of thermal paper.**

Usage for display purposes is possible for approximately one year in a standard indoor environment (room temperature, normal humidity, 500 lx fluorescent lighting). However, it is not suitable for use in environments where the tape will be exposed to direct sunlight or other strong light, water, or high temperatures and/or humidity. Rubbing the printing tape with hard objects or against different surfaces will cause the paper surface, printed content, etc. to fade.

**Washi Tape!** "coharu Tape" is removed, you can tear it off anytime!

Length: 4 m

There are more designs, check the details in our website. (<http://www.kingjim.co.jp/sp/english/>)

Not suitable for long-term display purposes.

Different kinds of tapes can be used on TEPRA Lite. Check here for more information. ▶ [http://kingjim.jp/tape\\_e/](http://kingjim.jp/tape_e/)

Coharu tape is made of thermal paper. Exposing it under direct sunlight or strong light sources, high temperatures and humidity environments, or rubbing it with hard objects or against different surfaces, or leaving it in contact with hand lotions or similar medicinal products may cause the printed content to fade or damage the surface of the tape.
